PROFILE

Final-year Software Engineering student specializing in **Artificial Intelligence** and **Full-Stack Web Development**. Experienced in building AI-driven systems, NLP applications, and scalable web platforms through internships and academic projects.

PROFESSIONAL EXPERIENCE

Summer Intern

FLO Group

08/2025 – 08/2025

Online

Developed an **NLP-based** system using multiple language models to summarize presentation content and extract key insights, improving information accessibility.

Web Developer

AI Bunny

08/2024 – 03/2025

New York, United States of America

Built company website frontend with **React** and integrated AI **chatbot** interface. Contributed to marketing-oriented UI improvements increasing user engagement.

Summer Intern

Adapha Yapay Zeka

07/2024 – 08/2024

Samsun, Türkiye

Trained **computer vision** models and implemented **image processing** pipelines on real-world datasets to improve detection accuracy.

EDUCATION

BSc Software Engineering

Mugla Sitki Kocman University

09/2021 – 06/2026

Mugla, Türkiye

ORGANISATIONS

Mugla Blockchain Student Community

Board Member/Founder

11/2023 – 03/2025

Mugla, Türkiye

PROJECTS

Automated Detection of PPE Using YOLO

Graduation Project

- Designed a real-time multi-camera surveillance system for safety-violation detection using asynchronous and multi-threaded processing.

Voice-Based AI Interview Platform

Personal Project

- Built AI interview simulator with real-time speech recognition (Deepgram) and dynamic question generation & evaluation using Gemini LLM.

Deep Search with Retrieval-Augmented Generation (RAG)

Lift Up Program Turkish Aerospace Industries (TUSAŞ)

- Developed a Deep Search system using Retrieval-Augmented Generation (RAG) to enable semantic search over document-based data sources.

SKILLS

- Java / Python
- Node.js / Express.js / Next.js
- React / JavaScript / TypeScript
- SQL / MySQL / PostgreSQL
- Deep Learning / Computer Vision
